

Actual saved ViT/SCTM forward path on 256 CIFAR-10 samples. Baseline acc=0.559, loss=1.235. Random selected-route control is mean over 8 seeds (loss-delta std=0.024); top-1 minus random mean loss delta=0.191. This is a task-level intervention on selected SCTM routes, not a dense-attention matrix proxy.
